

# 'Concrete Framing' Gazette

March 12, 2008

## First Time Installers Breaking 'Time' Records:

*The Men from Ocala set the pace for other methods of construction to beat.*

**H. John Griffin II**  
All Wall Company, Inc

The right attitude, the ability to learn, and the desire to "Build Better for the People of the World" is being exemplified today in Gainesville, FL.

You take the men from M&M Enterprises, out of Ocala, FL, that have years of experience in wood framing, and you find a resourceful GROUP that makes installing the wall panels of the patented "All Wall System™" seem too easy to believe.

They were trained and then installed the walls with window openings, door openings, and corners in 2 hr 24 min for 38'9" of wall. The walls only need to be filled with concrete and then is 100% ready for over 200 mph winds. The walls finish on the interior with a little gypsum mud and on the exterior with about 1/8" of Cementitious finish. Both the interior and the exterior are ready for painting at that point.

### Pictures documenting FACTS:
